SalesPad DataCollection Overview

DataCollection is a Windows® Mobile barcode data collection application that integrates fully with Microsoft® Dynamics GP. With DataCollection operating on a Windows Mobile device equipped with a scanner, users can scan receipts of a product, locate inventory, and scan products for bin transfers, or as they are fulfilled to orders.

Combined with the functionality of Microsoft Dynamics GP, and optionally, SalesPad®, DataCollection users can enter purchase receipts and print bar-coded receiving or fulfillment paperwork and item barcode labels in one application.

Key Features

- Order picking and packing
